#### **Factors which are material for the purpose of assessing the market risks associated with Bond:**

The Bonds may not be a suitable investment for all investors. Each potential investor in the Bonds must determine the suitability of that investment in light of its own circumstances. In particular, each potential investor should:

- (i) have sufficient knowledge and experience to make a meaningful evaluation of the Bonds, the merits and risks of investing in the Bonds and the information contained or incorporated by reference in this Securities Note and/or Registration Document or any applicable supplement;
- (ii) have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation, an investment in the Bonds and the impact the Bonds will have on its overall investment portfolio;
- (iii) have sufficient financial resources and liquidity to bear all of the risks of an investment in the Bonds, including where the currency for principal or interest payments is different from the potential investor's currency;
- (iv) understand thoroughly the terms of the Bonds and be familiar with the behaviour of the financial markets; and
- (v) be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

**Modification and Waiver**

The conditions of the Bonds contain provisions for calling meetings of bondholders to consider matters affecting their interests generally. These provisions permit defined majorities to bind all bondholders including bondholders who did not attend and vote at the relevant meeting and bondholders who voted in a manner contrary to the majority.

Please see the Bond Terms for the Bond Trustee's power to represent the Bondholders and the duties and authority of the Bond Trustee.

## 1 Risk Factors

Investing in bonds issued by Bonheur ASA (the “Issuer”) involves inherent risks as is the case for all bonds in general. Prospective investors should consider, among other things, risks and uncertainties related to both the market in general, related to the Issue and the Bonds and the risk factors set out in the Prospectus, including those related to the Issuer as set out in the Registration Document, before making an investment decision. The risks and uncertainties described in the Prospectus, including those set out in the Registration Document, are risks of which the Issuer is aware and that the Issuer considers to be material to its business. If any of these risks were to occur, the Issuer’s business, financial position, operating results or cash flows could be materially adversely affected, and the Issuer could be unable to pay interest, principal or other amounts on or in connection with the bonds. Prospective investors should also read the detailed information set out in the Registration Document dated 18 February 2020 and the Supplement dated 2 November 2020 to the Registration Document and reach their own views prior to making any investment decision.

### Risk related to the market in general

#### ***Interest rate risk***

The coupon payments, which depend on the NIBOR interest rate and the Margin, will vary in accordance with the variability of the NIBOR interest rate. The impact on pricing of the Bonds itself related to interest rate risk will be limited, since the coupon rate will be adjusted quarterly according to the change in the reference interest rate (NIBOR 3 months) over the 5-year tenor. The primary price risk for a floating rate bond issue will be related to the market view of the correct trading level for the credit spread related to the bond issue at a certain time during the tenor, compared with the credit margin the bond issue is carrying. A possible increase in the credit spread trading level relative to the coupon defined credit margin may relate to general changes in the market conditions and/or Issuer specific circumstances.

#### ***Market risk***

The price of the Bonds will be impacted by a combination of the general credit markets fundamentals, the market’s view of the credit risk of the Issuer and the liquidity of the Bonds in the market. As such, despite an underlying positive development in the Issuers business activities, the price of the Bond may fall independent of this fact. Bond issues with a relatively short tenor and a floating rate coupon rate do however in general carry a lower price risk compared to bonds with a longer tenor and/or with a fixed coupon rate.

#### ***Liquidity risk***

There can be no assurance given regarding the future development of a trading market for the Bonds. Missing demand in the secondary market for the bonds may result in a loss for the bondholder. No market-maker agreement is entered into in relation to this bond amendment, and the liquidity of bonds will at all times depend on inter alia the market participants view of the credit quality of the Issuer as well as the general liquidity available in the bond market.

#### ***Reference rate risk***

The bonds are linked to NIBOR. NIBOR and other benchmark rates are the subject of recent national and international regulatory guidance and proposals for reform including, without limitation, the potential replacement of NIBOR as a reference rate.

### Risk related to the Issue and the Bonds

#### ***Debt service risk***

The Issuer is a holding company and may be dependent upon cash being distributed from its subsidiaries to be able to service payments in respect of the Bonds. Contractual provisions or laws as well as financial restrictions may impact subsidiaries possibilities to distribute cash to the Issuer.

#### ***Refinancing risk***

The Issuer may in the future be required to refinance certain or all of its outstanding debt, including the Bonds. The Issuer’s ability to successfully refinance such debt is dependent on the conditions of the financial markets in general at such time, and in the financial position of the Group. A deterioration in the financial position may reduce the Group’s ability to obtain any debt financing required to repay Bondholders at the time of the maturity of the Bonds. As a result, the Issuer’s access to financing sources at a particular time, may not be available on favourable terms, or at all. The Issuer’s inability to refinance its debt obligations on favourable terms, or at all, could have a material adverse effect on the Group’s business, financial condition and results of operations and on the Issuer’s ability to repay amounts due under the Bonds.

#### ***Subordination relatively to claims in subsidiaries***

None of the Issuer’s subsidiaries guarantee or have any obligations to pay amounts due under the Bonds. Generally, claims of creditors of a subsidiary including inter alia lenders under existing secured indebtedness related to wind parks

and offshore wind transportation and installation vessels and trade creditors will have priority with respect to the assets of the subsidiary over the claims by holders of the Bonds.

***Change of control***

The Bond Agreement includes a change of control clause which can give each individual bondholder a right of pre-payment of the Bond at a price of 101% of par. The Issuer's ability to redeem the Bonds with cash in such a situation may be limited and it cannot be assured that there will be sufficient funds available to make these repayments.
